### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Examiner notes that Claims 10 and 11 are dependent on Claim 9.

Examiner notes that Claim 32 is dependent on Claim 31.

### REASONS FOR ALLOWANCE

2. Claims 1, 5-6, 8-12, 14-34 are allowed.

Following is the Examiner's statement of reasons for allowance.

The prior art of record specifically Baum et al (Pub. No.: US 20050264832) fails to suggest or disclose the collective features of the invention such as: "further comprising a device control step suited to control, when the first schedule is set, the plurality of devices of the image forming system to complete the second work flow for the second job input after the first job, after completion of the first work flow for the first job, and to control, when the second schedule is set, the plurality of devices of the image forming system to complete the second work flow for the second job input after the first job, before completion of the first work flow for the first job" these features along with the rest of the claim's 1 limitation would render Claim 1 allowable.

The features of "further comprising an informing control step of controlling a user interface unit to execute an informing process of schedule information associated with a scheduling result set in the scheduling control step, and wherein the informing control step includes a step of controlling the user interface unit to inform different kinds of schedule information depending on

whether the first or second instruction is input” these features along with the rest of the claim’s 8 limitation would render Claim 8 allowable. The features of “wherein the informing control step includes steps of: controlling, when the first instruction is input, the user interface unit to execute an informing process of first schedule information that allows a user to identify that it is scheduled to complete the second work flow for the second job input after the first job, after completion of the first work flow for the first job; and controlling, when the second instruction is input, the user interface unit to execute an informing process of second schedule information that allows a user to identify that it is scheduled to complete the second work flow for the second job input after the first job, before completion of the first work flow for the first job” these features along with the rest of Claim 9 would render Claim 9 allowable. The features of “wherein the image forming system has at least one of a device which can execute a job order process, a device which can execute a job edit process, a device which can execute a job proof process, and a device which can execute a job archiving process, and also the image forming device and the sheet processing device, and the scheduling control step includes a step of setting a schedule suited to execute a work flow having a plurality of process steps including a print process step using the image forming device and a sheet process step using the sheet processing device” these features along with the rest of the claim’s 12 limitations would render Claim 12 allowable. The features of “wherein the informing control step includes a step of controlling the user interface unit to inform first type schedule information that allows a user to confirm an execution order of the plurality of process steps using the plurality of devices required to execute the work flow, and controlling the user interface to inform second type schedule information that

allows the user to confirm an operator intervention work required to execute the work flow”  
these features along with the rest of the claim's 14 limitations would render Claim 14 allowable.
